(54) REFLECTOR TYPE SCREEN AND MANUFACTURE THEREOF

(57)Abstract

PURPOSE: To manufacture a reflector type screen for reflecting a projection image, which is of particularly high reflecting brightness, and of little difference in brightness even when angles of visibility are different.

CONSTITUTION: In a reflector type screen for which an optical reflection layer 4 is provided on a base 1 comprising film or sheet, a hollow polymer particle 5 is used for the optical reflection layer 4, and a metal thin film 3 having optical reflective characteristic is provided above or below the hollow polymer particle 5, when necessary. A reflector type screen of high reflection brightness and of little difference in brightness even when angles of visibility are different, is thus obtained.
